## Epson Releases New Cleaning Kit

**Auburn, Maine** - Epson, a leading manufacturer in the printer, professional imaging, projector, scanner, and systems devices has announced the release of its latest cleaning kit designed to maintain the operational efficiency of their check scanning products. The kit, officially **#KWEPS-KCS2** –Epson Check Scanner Cleaning Kit, will have an MSRP of under \$45.

The Epson Cleaning kit was engineered to Epson's specifications to clean the sensitive magnetic heads, lenses, and transport rollers within the scanner. The cleaning products specifically remove inks, paper particles, and other dirt from the scanner lenses and interiors of all the Epson® check scanners including the TM-S9000, TM-S2000 and CaptureOne™ products. The products included within the kit (16 Cleaning cards, 4 wipes and 4 swabs) are intended to be an integral part of a routine preventative maintenance program and when used correctly, will provide each scanner for up to 4 months of cleaning.

“KICTeam is very excited that Epson recognizes that there is value in partnering with us in order to keep their exceptional devices operating at optimal levels,” said the Vice President of Business Development for KICTeam. “The idea to mandate routine cleaning has proven extremely effective in the financial market saving institutions thousands monthly.”

### **About KICTeam**

KICTeam is the world leader in designing and manufacturing disposable custom products that include cleaning solutions that increase operational efficiency and reduce device maintenance and ownership costs. Since the introduction of the ingenious, patented Waffletechnology® in 2004, KICTeam has educated thousands of major companies across multiple industries, in the fast, easy, money saving techniques and the benefits of preventative equipment cleaning. The Auburn, Maine, USA, facility includes production, warehousing, order fulfillment and sales and executive offices. KICTeam has regional servicing and distribution locations in the UK, Canada, Oceania, Europe, Brazil, and Singapore. KICTeam works closely with OEM partners to educate the market about the benefits of using their patented products. For more information, visit [kicteam.com](http://kicteam.com).
